

The Dieffenbacher Pellet Plant Concept

Benefits

- Reduces your production cost by € 5–10 per ton of pellets
- Has a guaranteed performance
- Is based on more than 20 references in the pellet industry and hundreds of references in wood processing plants

The Dieffenbacher Pellet Plant Concept

90-0000-00-25-74 - 09/11

Examples of production cost savings

- ClassiSizer wet milling reduces power consumption by 10 kwh/to and wear part cost by 30%
- ClassiSizer wet milling and ClassiScreen cleaning reduces ash content of Forest Chips to below 1%
- Drum dryer reduces wood fuel consumption by 20%
- With the ClassiSizer wet milling no dry milling is required
- Pellet Press needs 15% less electric power, has 20% longer die life and 100% longer roller life. Capacity up to 25 to/h per unit

Examples of references in the wood pellet industry

- Bio Energy Mudau, Germany
- Unnamed customer, USA
- Kim Hock, Singapore
- Scala Energy, Ukraine
- Ziegler Erdenwerk, Germany
- HoweE Holzwerkstoffe Eberswalde, Germany
