

Press & Forming Systems for the Wood, Plastic & Metal Industries

PLANT MODERNIZATION

At Dieffenbacher, economic plant modifications are the focus of activities in the Modernization Department. To satisfy our customers' needs, Dieffenbacher employs engineers and technologists who are specialized in cost-effective and efficient modernization. Customized concepts are created with the aim of increasing production and quality as well as safety.

Contact us today to see how we can contribute to your success.

Increasing Plant Capacity:

- Length extension of single opening presses
- Additional daylight in multi-opening presses
- Length extension of CPS presses
- Extension of forming stations
- Extension of glue dosing
- Speed increase for forming line and press
- Integration of continuous belt prepress

Improvement in Product Quality:

- Process optimized control of control loops.
 - Dry Bin-Forming Station/Forming Line
 - New electric and Hydraulic controls for the press
- Integration of additional weighing equipment
- Replacement of forming stations and former components

Integration of New Components:

- Recipe management
- Integration of frequency controlled drives
- Installation of new control systems with visualization

Integration of New Technology:

- Adaptation of equipment, hardware and software
- Minimization of dead time for press cycles
- Minimization of downtime for new equipment modifications

We would be pleased to visit your manufacturing site to discuss any modifications that you might be considering.
