

ContiPlus® Continuous Press—Your Core Competitiveness

Continuous press is, with its high productivity, energy and raw material economy, stable product's quality, and a complete spectrum of finished boards, becoming the trend of the wood-based panel machinery development in the world.

Shanghai Wood-Based Panel Machinery Co., Ltd. (referred as SWPM) has succeeded in developing its first Continuous Press, which was also successfully put into operation in Europe in Oct, 2007. After site inspection of China Woodworking Machinery Inspection Center, the Continuous Press technology was entitled to be as advanced international technology and its safety performance comply with the CE Standard.

After great efforts of many years, SWPM can confidently supply its valued customers with advanced and stable ContiPlus® Continuous Press for MDF, PB and OSSB.

Basic technical data of 4'×33.5m ContiPlus®

Continuous Press

- ◆Product.....MDF/HDF
- ◆Finished board (or net) width.....4ft
- ◆Pressing length.....33.5m
- ◆Thickness range.....3~25mm
- ◆Press speedmax. 900 (1.000)mm/s
- ◆Design capacity.....350m³/d
- Thickness.....8mm
- Density.....810kg/m³
- Daily working time.....22.5h/d

Your decision on SWPM is the promise for mature technology and high value-added products.
