Glue Preparation and Dosing System

**Application**
Resin and chemical handling and dosing for PB, MDF and OSB plants

**Description**
Trucks or train cars can unload directly into storage tanks. Powder handling and diluting systems can be adapted and sized according to site needs. Dosing of components is carried out with adjustable and accurate dosing pumps which are controlled by flow meters and assure optimum material flow.

**Customer benefits**
- Complete system with fully automatic control and open systems
- Accurate dosing results in direct savings

**Technical features**
- Storage systems
- Powder dosing systems
- Diluting systems
- Glue dosing systems:
  - In-line dosing
  - Batch dosing
  - Gravimetric dosing
